

Thomas Katsikadacos

Software developer

I am a motivated software developer with 2 years of full-stack experience in creating web applications using React, Next.js, Tailwind, Node.js, Express, Docker, Docker Compose, and Nginx. I am dedicated to delivering high-quality, scalable solutions that align with client requirements. My current goal is to make a permanent move to Copenhagen, Denmark.

WORK EXPERIENCE

Photographer - Videographer

As a freelancer

09/2011 - 11/2021

Greece

Achievements/Tasks

- I've had an 8-year career, during which I developed a strong professional attitude.
- I worked for the Byzantine & christian museum of Athens for two years and I've created five advertisements that were broadcast nationally on television.
- I've curated catalogs and conducted photoshoots for delicate artifacts.

Software Developer

Technature IKE

09/2021 - Present

Athens, Greece

A company producing website and software solutions with specialty for the healthcare business

Achievements/Tasks

- I produce testable and maintainable code for both the frontend and backend.
- I actively work on, create, and oversee the development of the company's platforms and websites using Node.js, Next.js, and MongoDB.
- I take on the responsibility of deploying applications to production, leveraging Docker within Linux server environments.
- I engage in client communication and project leadership to ensure successful project outcomes.
